**American Red Cross**

# RISK/VULNERABILITY ASSESSMENT

Output #3

TYPES OF HAZARD	RISK			REASON
	LOW	MEDIUM	HIGH	
<b><i>Typhoon (Yolanda)</i></b>			X	<ul style="list-style-type: none"> <li>Houses have weak foundations because they are made up of light materials</li> <li>Infrastructures also have weak foundations</li> <li>People went hungry</li> <li>People looted for goods for survival</li> <li>People were traumatized</li> </ul>
<b><i>El Niño</i></b>			X	<ul style="list-style-type: none"> <li>Most residents experienced hunger</li> <li>Residents are fond of burning plastic</li> <li>Long months went without rain</li> <li>Plants and animals died</li> </ul>
<b><i>Tornado</i></b>			X	<ul style="list-style-type: none"> <li>Most residents experienced trauma</li> <li>Most houses were damaged</li> </ul>
<b><i>Lightning</i></b>		X		<ul style="list-style-type: none"> <li>Only the appliances were damaged</li> </ul>

# VULNERABILITY and CAPACITY ANALYSIS

Output #5a

Hazard Aspect (El Niño)	Vulnerability	Capacities	Possible Action
<b>Physical / Materials</b>	<ul style="list-style-type: none"><li>•Deep wells and water pumps easily dried up</li><li>•Plants and trees dried up; farm animals were also affected</li></ul>	<ul style="list-style-type: none"><li>•Residents had one source of water/"burabod"</li></ul>	<ul style="list-style-type: none"><li>•Construct a water pump or a deep well that is situated near the center of the barangay</li></ul>
<b>Social / Organizational</b>	<ul style="list-style-type: none"><li>•No organization could help the barangay find a solution to the loss of water during extreme droughts</li></ul>	<ul style="list-style-type: none"><li>•Willingness of the barangay to create and organize an organization that could help request for water pumps</li></ul>	<ul style="list-style-type: none"><li>•Construct additional water pumps that can be utilized by the whole barangay</li></ul>
<b>Motivational / Attitudinal</b>	<ul style="list-style-type: none"><li>•Residents are not working together to find an alternative source of water</li></ul>	<ul style="list-style-type: none"><li>•Some residents have already requested for water pumps</li></ul>	<ul style="list-style-type: none"><li>•Arrange for an awareness campaign which would seek to encourage the hunt for more possible sources of water</li></ul>

# VULNERABILITY and CAPACITY ANALYSIS

## Output #5b

Hazard Aspect (LIGHTNING)	Vulnerability	Capacities	Possible Action
<b>Physical / Materials</b>	<ul style="list-style-type: none"><li>•Most households have electrical appliances</li><li>•The barangay is situated at an elevated/high area</li></ul>	<ul style="list-style-type: none"><li>•Each appliance is plugged to only one electric socket which prevents the flow of electric current</li></ul>	<ul style="list-style-type: none"><li>•During such times, residents should unplug their appliances and turn off the main switch</li></ul>
<b>Social / Organizational</b>	<ul style="list-style-type: none"><li>•People lack knowledge on what to do during lightning/when lightning strikes</li></ul>	<ul style="list-style-type: none"><li>•The people are very cooperative and willing to learn</li></ul>	<ul style="list-style-type: none"><li>•Plan and listen to weather forecasts/news advisory</li><li>•Be ready and alert</li></ul>
<b>Motivational / Attitudinal</b>	<ul style="list-style-type: none"><li>•People don't usually unplug their electrical devices during lightning</li><li>•People tend to "overuse" their gadgets up to the point where they don't mind even if lightning strikes</li></ul>	<ul style="list-style-type: none"><li>•People are aware that when lightning strikes, they should cover the things that could possibly attract it</li></ul>	<ul style="list-style-type: none"><li>•To be safe, all electrical appliances should be unplugged; people should also stay in safe places</li></ul>

# VULNERABILITY and CAPACITY ANALYSIS

Output #5c

Hazard Aspect (TYPHOON)	Vulnerability	Capacities	Possible Action
<b>Physical / Materials</b>	<ul style="list-style-type: none"> <li>•Most houses are made up of light materials</li> <li>•Not all houses are concrete</li> <li>•Most of the houses don't have sturdy posts</li> </ul>	<ul style="list-style-type: none"> <li>•Some concrete houses have strong foundation</li> </ul>	<ul style="list-style-type: none"> <li>•In the future, residents should construct sturdier posts and build a better housing foundation</li> </ul>
<b>Social / Organizational</b>	<ul style="list-style-type: none"> <li>•The barangay did not immediately gain access to relief items from different government and nongovernment organizations</li> </ul>	<ul style="list-style-type: none"> <li>•The barangay easily comes together in terms of asking for help from other organizations</li> </ul>	<ul style="list-style-type: none"> <li>•Identify organizations that could possibly help the barangay in times of disasters</li> </ul>
<b>Motivational / Attitudinal</b>	<ul style="list-style-type: none"> <li>•Most of the residents disregard notices from authorities to evacuate to safer places</li> <li>•Other residents practice ignorance: even if they already know that a life threatening event is bound to happen, they don't plan and prepare for it</li> </ul>	<ul style="list-style-type: none"> <li>•Some residents heed the call of the authorities to evacuate</li> </ul>	<ul style="list-style-type: none"> <li>•People should be made aware or be warned of upcoming typhoons</li> </ul>
